

RWE

**Our most important
source of energy:
willpower.**

We are shaping the energy world of tomorrow.

RWE has been reliably supplying people and companies with electricity for over 125 years. Today we are one of the leading global players in renewables.

Our task:

Our society's demand for electricity is constantly increasing. At the same time, we need to protect the climate. To achieve this, we need **safe and clean electricity**.

Our strategy:

We are setting the pace and investing billions every year – above all in the expansion of offshore and onshore wind, solar energy and in combination with battery storage and flexible generation.

> 30 years

of experience in
renewable energy

Investing in the future brings sustainable rewards – ecologically and economically. As a long-standing and financially strong partner, we contribute to the decarbonisation of the energy system.

For us, net zero means: working on it every day.

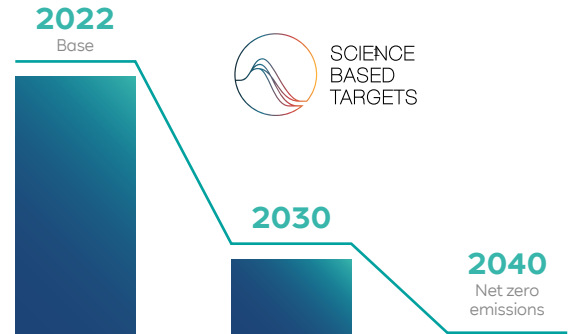

Our goal:

climate neutral by

2040

Specifically, this means that we at RWE are systematically reducing our greenhouse gas emissions – in line with the 1.5-degree reduction path. We are responsibly phasing out coal-fired power generation by 2030.

Our path to net zero

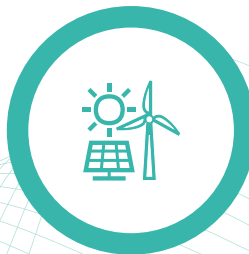

Success?

It's all a question of positioning.

Diversely positioned for a clean and safe future.

Offshore wind

Worldwide offshore activities

Onshore wind/solar

Onshore, solar and storage activities in Europe, Australia and America

Flexible generation

- Hydro, biomass and gas-fired power plants
- Hydrogen projects
- Battery storage systems

Supply & Trading

- Trading/Origination
- Gas & LNG
- Commodity solutions
- Gas Storage

We deliver solutions for tomorrow: Today.

We consistently invest in **innovative technologies and sustainability**, for example:

- Floating offshore wind & solar
- Agri-Photovoltaics
- Utilisation of CO₂
- Use of more environmentally friendly steel and more recyclable rotor blades
- Recultivation and biodiversity

At the same time we consistently generate: Added value for all.

Securing land & project development

Extensive expertise

Planning & Procurement

Global engineering and local commitment

Construction

On time and on budget

Marketing

Customised solutions and financial security

Operation

Many years of experience as an independent operator

**Our energy has impact.
Use yours for good.**

The world around us is changing. And we are changing with it. We are a team of over 20,000 people who work with passion and energy every day for a sustainable future.
